CONNECT TO REDDOT CMS AT GEORGIA STATE UNIVERSITY

You can connect to RedDot CMS at GSU from on-campus or off-campus for Windows PC.

• From On-Campus:
  o Open Internet Explorer. In the address bar, type [http://reddot.gsu.edu](http://reddot.gsu.edu) and press Enter
  o The log-in box display and enter your username and password
    o Click **Start** to log in

• From Off-Campus:

  *For security reasons, before establishing a connection to a RedDot server, you must first connect to Georgia State’s Virtual Private Network using Cisco System VPN Client software. If you have CISCO systems VPN client software installed on your home workstation, complete the following steps:*

  o Launch Cisco VPN Client and double-click **Off Campus VPN**

    o Enter user name and password. The user name is a GSU campus ID. If you don’t know your campus ID, please use the following link to look it up: [http://campusdirectory.gsu.edu/](http://campusdirectory.gsu.edu/)
- Click OK.

- After you have connected to the Georgia State University VPN server, follow the steps From On-Campus above to log on to RedDot.
